

GET INVOLVED

STOP SHORT YELLOW LIGHTS!

INSTRUCTIONS: Choose an intersection with a red light camera. Make 5 attempts at recording the yellow light time in seconds. Then, take the average of the five records to get your final yellow light time. We recommend that you go to an intersection that has no camera on the same road if possible, with the same speed limit. Make 5 attempts there, and average the times for comparison. If you don't have red light cameras in your area or are unable to participate in the project, your financial donation will still enable us to move forward with this project and help fund press releases, traffic engineering studies, and litigation if necessary.

Location of light (w/camera) _____

Posted Speed Limit	1 st Time _____ sec	2 nd Time _____ sec	3 rd Time _____ sec
_____	4 th Time _____ sec	5 th Time _____ sec	Average _____ sec

Location of light (w/out camera) _____

Posted Speed Limit	1 st Time _____ sec	2 nd Time _____ sec	3 rd Time _____ sec
_____	4 th Time _____ sec	5 th Time _____ sec	Average _____ sec

Posted Speed (MPH)	Recommended Minimum Yellow Light Times (seconds)
25 or less	3.0
30	3.5
35	4.0
40	4.5
45	5.0
50	5.5
55	6.0

You may copy this form for additional light locations. Mail the form(s) to NMA, 1001 Arboretum Dr, Ste. 120, Waunakee, WI 53597, or email it/them to nma@motorists.org.
